

Construction Starting on Commuter Rail

The MBTA will start a 2 month Emergency Demolition project of ramps, platforms and canopies connected to the downtown Commuter Rail Station beginning at the end of January 2021. The project will span from the Quill Rotary to the Aberjona/Waterfield Parking lots. The town will post information on www.Winchester.us.

FOR ADJACENT BUSINESSES/RESIDENTS:

MBTA officials will be conducting surveys to measure noise and vibration levels BEFORE and during the project. The measurements will take place inside nearby buildings and the state may need to arrange access. Send questions/Comments to: WinchesterStation@mbta.com
